

AI Career Analysis Report

Recommended Career: Machine Learning Engineer

Career Match Score: 80%

ATS Resume Score: 92/100

Detected Skills: computer vision, pytorch, seaborn, matplotlib, feature engineering, github, python, xgboost, deep learning, numpy, aws, git, cnn, machine learning, iot, keras, tensorflow, azure, sql, power bi, opencv, pandas, excel

Resume Feedback:

- Strong technical skill set detected.
- Excellent career alignment.
- Resume contains important sections.

Career Skill Gap Analysis:

Data Scientist (75%)

Missing Skills: statistics, scikit-learn

Data Analyst (66%)

Missing Skills: tableau, data analysis

Machine Learning Engineer (80%)

Missing Skills: scikit-learn

AI Engineer (40%)

Missing Skills: nlp, generative ai, llms

Frontend Developer (0%)

Missing Skills: html, css, javascript, react, bootstrap

Backend Developer (40%)

Missing Skills: django, flask, mongodb

Full Stack Developer (0%)

Missing Skills: html, css, javascript, react, node.js, mongodb

MERN Stack Developer (0%)

Missing Skills: react, node.js, express, mongodb, javascript

Software Engineer (20%)

Missing Skills: java, c++, data structures, algorithms

Cybersecurity Analyst (0%)

Missing Skills: cybersecurity, network security, linux, ethical hacking

Cloud Engineer (40%)

Missing Skills: docker, kubernetes, linux

Business Analyst (60%)

Missing Skills: communication, data analysis

Android Developer (0%)

Missing Skills: java, android, firebase

Flutter Developer (0%)

Missing Skills: flutter, firebase, dart
